Spring Water MAX

A cup of water exclusive to you

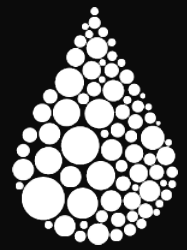

An adult human body contains approximately 36 trillion cells whose daily water intake from external sources is 1,500–2,000 ml.

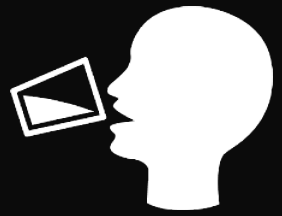

What Water Do We Need?

High purity

contains beneficial substances

smart customization

Otralife

Triple Purification | Focusing on "Purity" and "Benefit"

Purification
Purification rate:>99.9%

Mineralization
Rich in multiple beneficial minerals

Hydrogenation
Hydrogen content: 800–1300 ppb

High purity

contains beneficial substances

Otralife

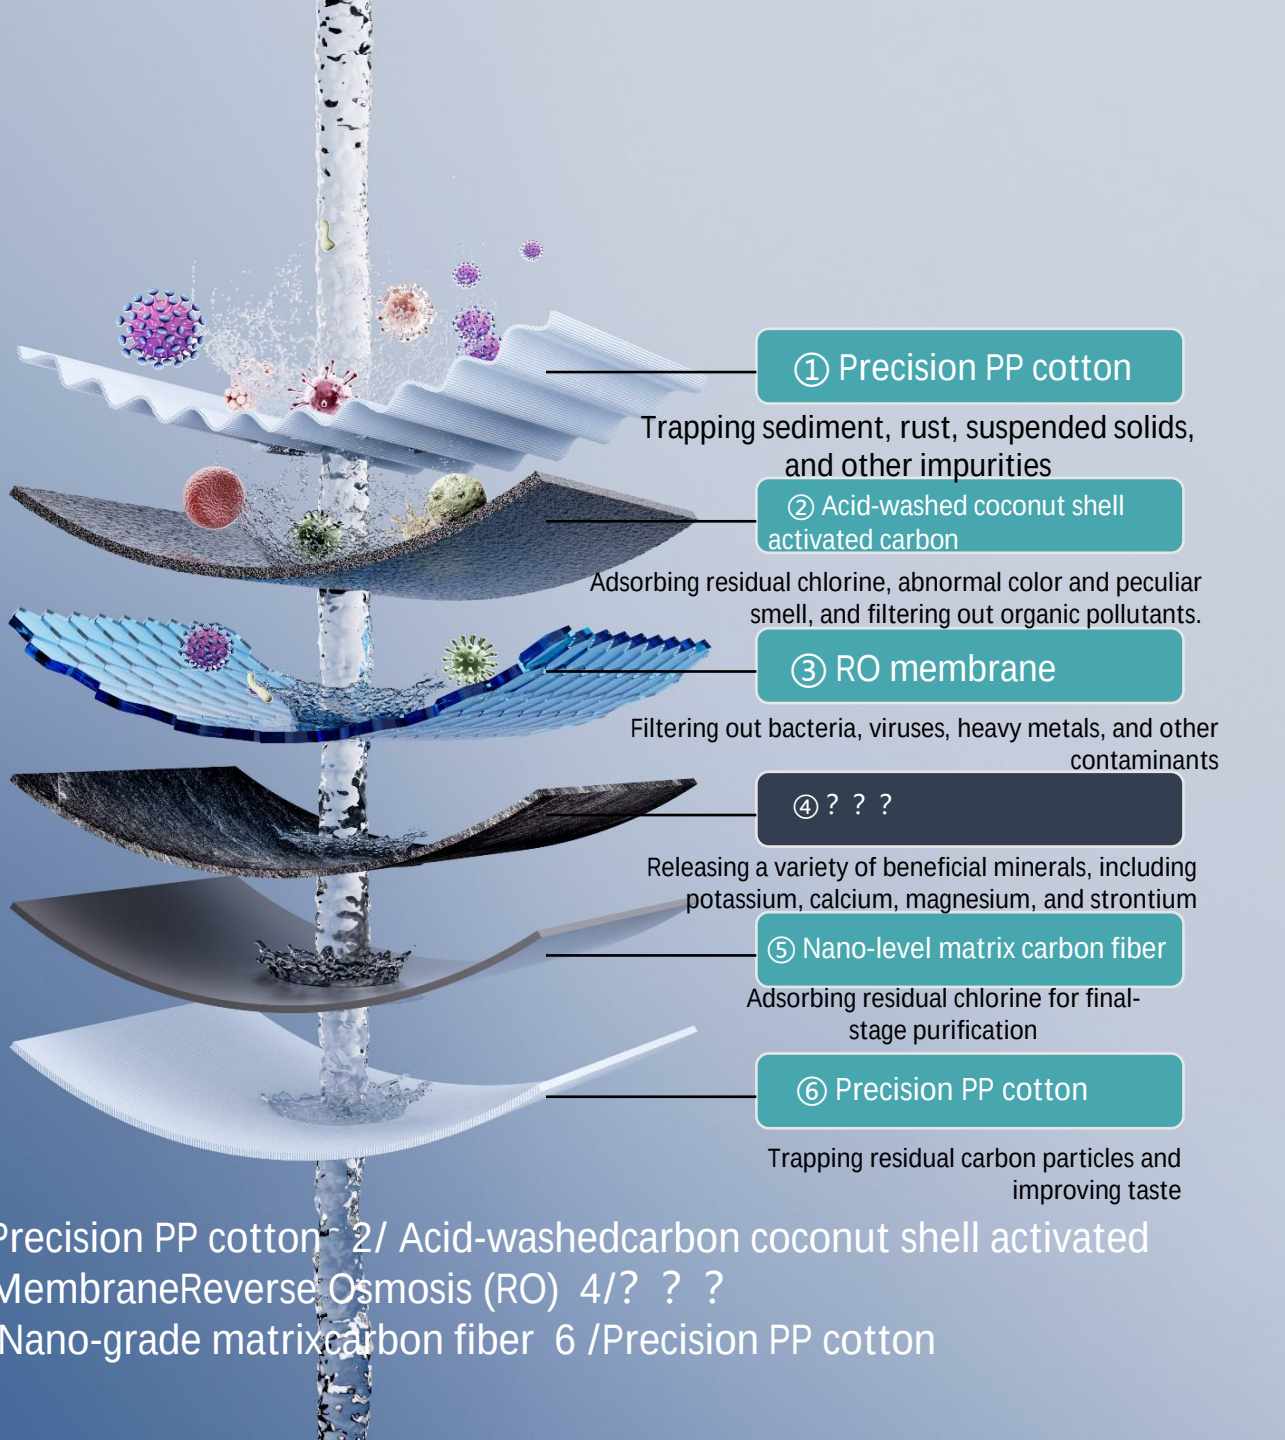

1 Purification

Nano-Level Purification

Smart composite core

Filtration precision reaches 0.1nm, capable of removing hundreds of harmful substances with an overall removal rate of over 99.9%.

> 99.9%	> 99.9%	> 99.9%	> 99.9%
Bacteria removal rate > 99.9%	Virus removal rate > 99.9%	Heavy metal removal rate > 99.9%	Residual chlorine removal rate > 99.9%

Otralife

One-Hand Filter Replacement as Easy as Opening a Drawer

Audible alert sounds when the filter cartridge needs replacing
Replace the filter with a simple lid opening—quick and effortless

1. Precision PP cotton

Trapping sediment, rust, suspended solids, and other impurities

2. Acid-washed coconut shell activated carbon

Adsorbing residual chlorine, abnormal color and peculiar smell, and filtering out organic pollutants.

3. RO membrane

Filtering out bacteria, viruses, heavy metals, and other contaminants

4. Nutrient crystal slow-release system

Releasing a variety of beneficial minerals, including potassium, calcium, magnesium, and strontium

5. Nano-level matrix carbon fiber

Adsorbing residual chlorine for final-stage purification

6. Precision PP cotton

Trapping residual carbon particles and improving taste

2. Mineralization: Nutrient Crystal Slow-Release System

Nutrient Crystal Slow-Release System

Produces beneficial minerals including potassium, calcium, zinc, magnesium, strontium and metasilicic acid in balanced concentrations.

Rich in Strontium

Strontium content >= 0.20 mg/L

Weakly Alkaline Water

Mineralized water pH: 7.3-7.8

Functions of Minerals

1. Building tissues: Calcium, phosphorus and magnesium form bones and teeth; iron supports hemoglobin, zinc and selenium support cell structure.
2. Physiological balance: Sodium and potassium regulate fluid balance; minerals and electrolytes support muscle, heart and acid-base balance.
3. Metabolism: Zinc, copper, manganese and selenium support enzyme activity, energy metabolism and protein synthesis.
4. Immunity and antioxidants: Selenium and zinc support immune cells; selenium and copper help counter free radicals.
5. Hormones and blood: Iodine supports thyroid hormones; iron and copper support blood formation.
6. Senses and nerves: Zinc supports taste and vision; calcium and magnesium support nervous system function and sleep.

3. Hydrogenation: Hydrogen-Rich Spring Water

Nano-Ceramic Hydrogen Dissolution System

Reliably produces hydrogen-rich water at 800-1300 ppb, with low noise, long service life, rapid hydrogen production and more stable hydrogen mixing.

SPE Electrolysis Module

Faster hydrogen production and higher efficiency.

Physical Hydrogen Mixing Technology

Stable hydrogen enrichment in room-temperature, cold and hot water.

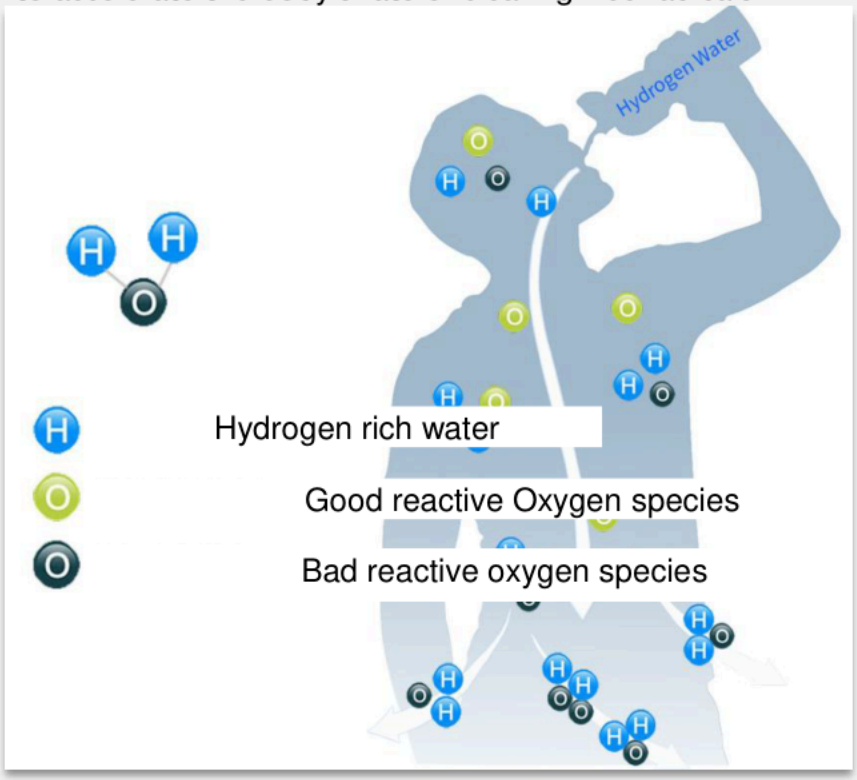

Drink hydrogen-rich water. Fight free radicals.

What can cause Free Radicals ?

Life stress, Ultraviolet (UV) radiation, Smoking, Makeup, Additives, Computers, Air conditioning, Photocopiers,Vehicle exhaust,Irregular daily routines

Free radicals are metabolic waste products that the body will surely produce. If not cleared in a timely manner, they will damage the body itself. Introduce foreign substances to accelerate the body's rate of clearing free radicals.

How To Make the Water Know Your Better You Do?

?

smart customization

Two-way Human-device Communication- Breaking the One-way Care Model

Continuous state monitoring →	Synchronous data upload→	Tap to get smart→	Tailor-made for the moment

Otralife

Various Recommendations for Different Scenarios

Your body needs not always the same cup of water

MODE	WaterVolume	Temperature
	300ml	35℃
Wake-Up/ Refresh	300ml	30℃
Active	450ml	10℃
	450ml	40℃
Intensive	450ml	45℃
Other.....	.....	.....

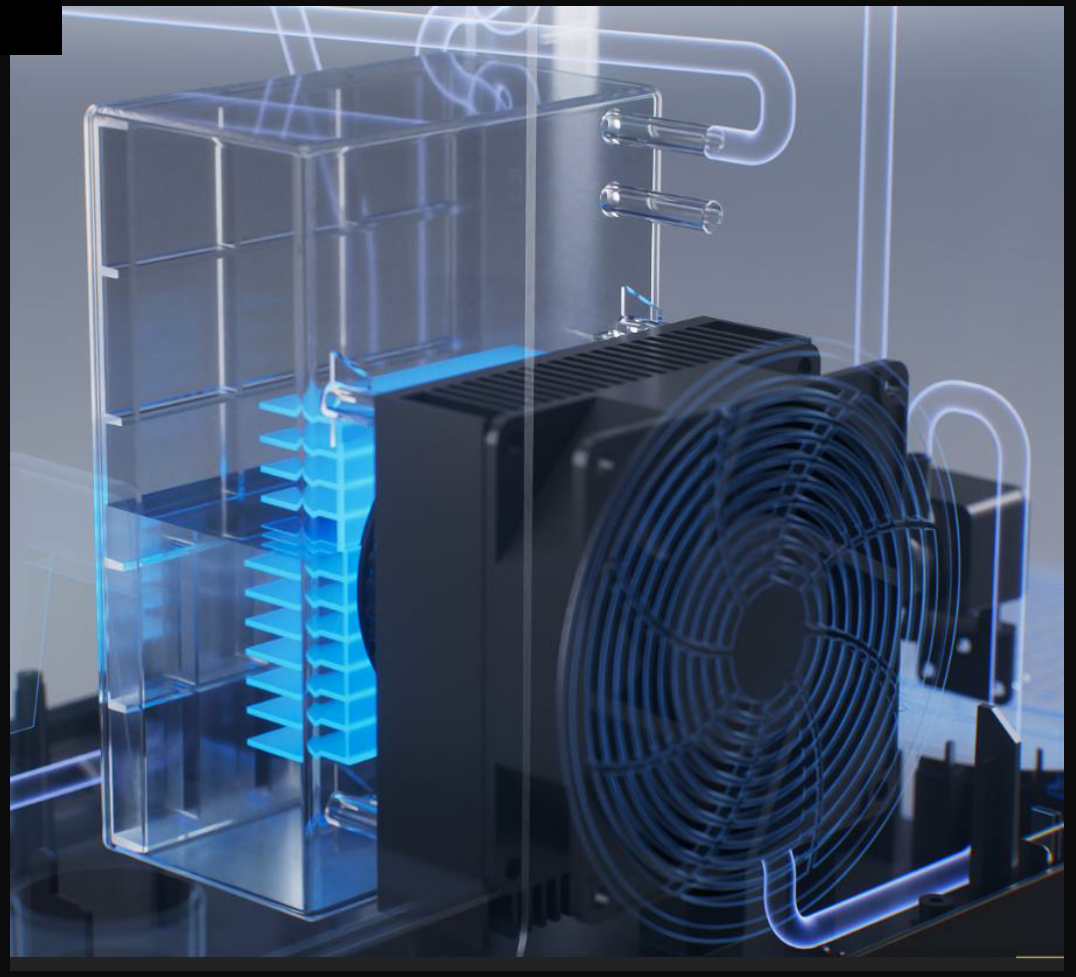

High-efficiency cooling technology

Double-Insulated Ice Tank

Double-foamed insulation for superior retention. 0.8L capacity ensures refreshing water anytime.

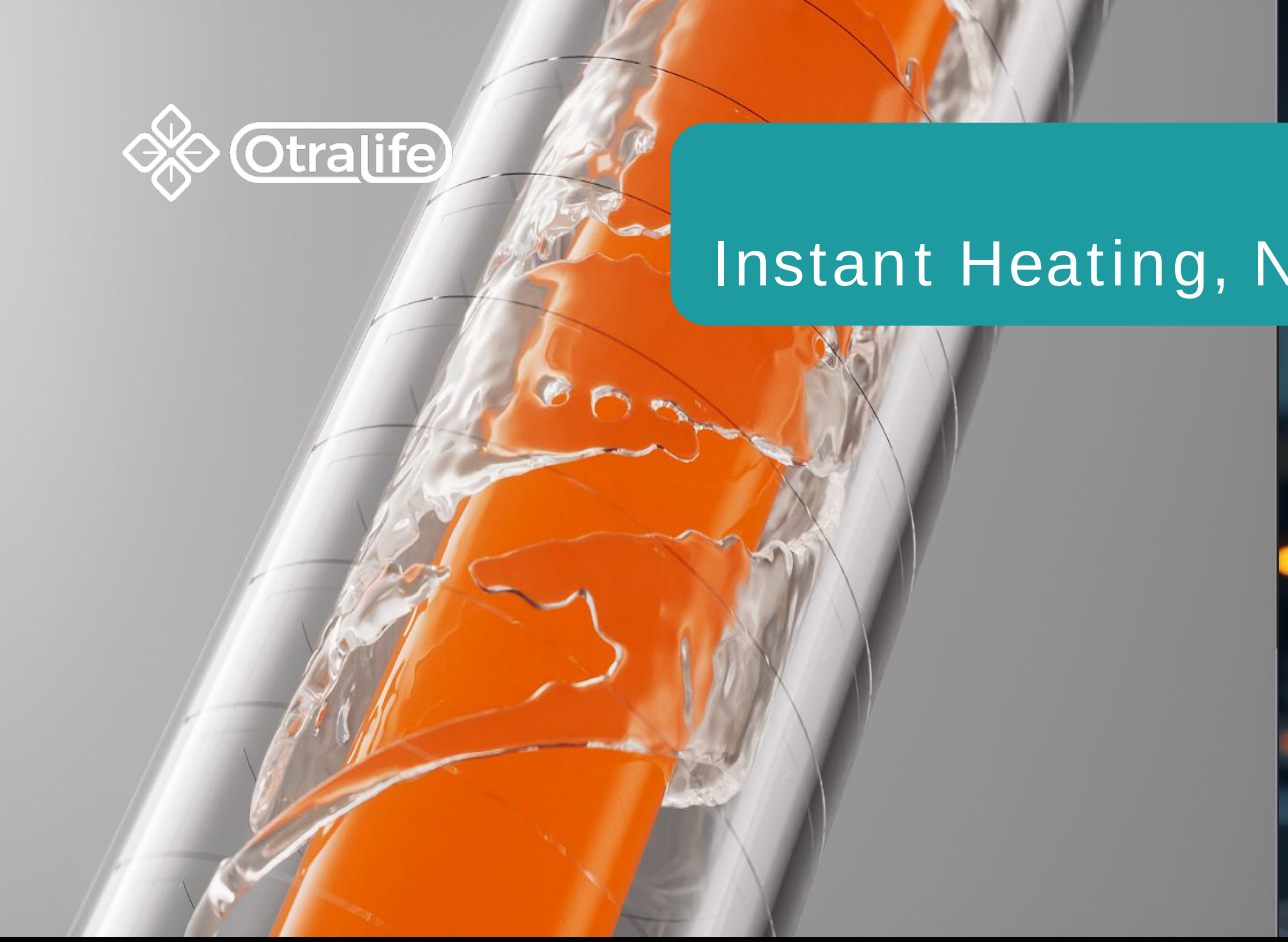

Advanced Thermoelectric Cooling

Compact, low-energy, achieves a constant 12°C cold-water output.

Otralife

Instant Heating, No Repeated Boiling

Thick-Film Instant Heating Technology

Heats water in seconds, not multiple times boiled water

VS

Hot Tank Heating

Repeated boiling results in repeatedly boiled water, requiring a wait to reheat after use

Multi-stage temperature and volume settings to meet different daily needs.

Pause anytime for fine-tuning the temperature. Be your own "water mixologist".

,
You can cause anytime during dispensing, and slide from left to right on the screen to select a new temperature

Large-Capacity Split Water Tank Convenient to Use

Split Integrated Water Tank Raw Water Tank: 3.8L + Wastewater Tank: 1.6L

Built-in 1.0L Purified Water Tank and 0.8L Iced Water Tank

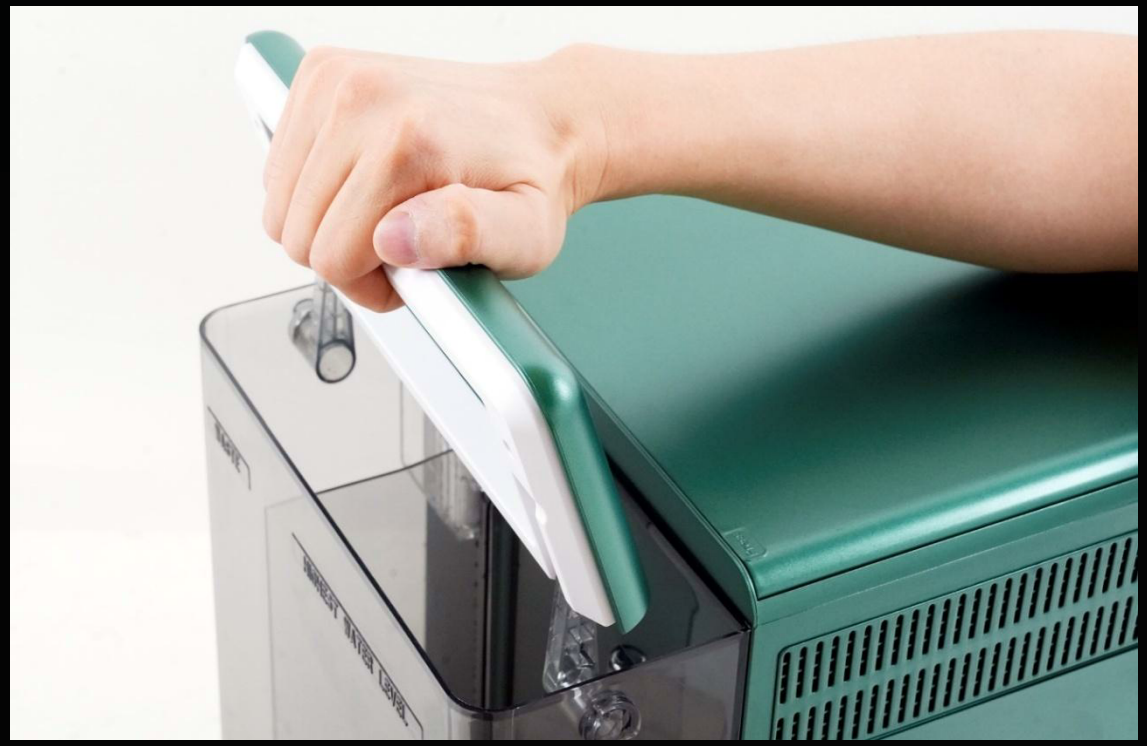

Dual Water Supply Modes to Suit Diverse Scenarios

Flexible Mode – No Installation Required

Comes with a built-in water tank for manual filling, suitable for various household settings without the need for installation

Fixed Mode – Pipelined Water Supply and Drainage

Rear water tank can be directly connected to water inlet and drainage pipes, allowing fully automated water refilling and discharge

Digital Touchscreen for Real-Time Water Quality Monitoring

Real-time display of TDS levels for both raw and purified water

Real-time percentage display of filter cartridge lifespan

Digital capacitive touchscreen operable even with wet hands

Simple and intuitive control buttons—easy to use for parents and the elderly

Child lock design for enhanced safety and peace of mind

Read the User Manual on the screen: know the operation and finish troubleshooting quickly.

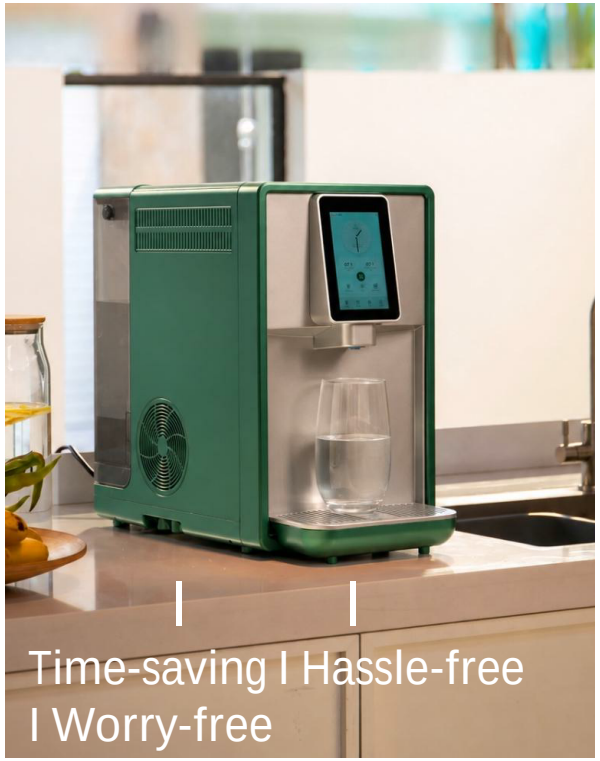

- The device stores 15 video clips, covering routine operations and troubleshooting.
- You can watch them on the screen anytime, with zero learning curve.

Comparison

- Large footprint, too big for the cabinet
- Too many filters, high replacement costs.
- Slow water flow, long waits to fill up.
- No mineralization or smart customization

Otralife
